NEORTC
264 South Arlington Street
Akron**

Description of each session:

Trust-Based Relational Intervention Module 1

Module one of the Trust-Based Relational Intervention (TBRI®) series will focus on understanding the meanings behind child behaviors, the brain chemistry of a child from a hard place and helping the child (and his/her family) heal and connect. Participants will learn tools they can put into action immediately. This module is a prerequisite for additional TBRI® modules.

Trust-Based Relational Intervention: Connecting Principles

This module of the Trust-Based Relational Intervention (TBRI®) series will guide participants through the attachment cycle, attachment styles, and what to do when things go wrong in attachment. Participants will learn to use the TBRI® connecting strategies of mindful engagement, choices, compromises, and life value terms.

Trust-Based Relational Intervention: Empowering Principles

This module of the Trust-Based Relational Intervention (TBRI(r)) series will focus on the physiological/internal roots of children's behavior, strategies for meeting children's sensory needs, and tools for making the environment feel safe and predictable for children. This training also creates a bridge between theory and application.

Trust-Based Relational Intervention: Correcting Principles

This module of the Trust-Based Relational Intervention (TBRI®) series will focus on understanding and implementing the proactive and responsive strategies within the corrective principles of TBRI®. In the proactive strategies we explore the benefits of balancing nurture and structure and introduce and explore four parenting styles. We will examine the benefits of the nurture group, as well as the necessity and strategies for teaching social and behavioral skills. In the responsive strategies we will explore the IDEAL Response© and the Levels of Response (TM).

Trainer:

Kristen King, M.Ed., TBRI Practitioner
